[WORLD PREMIERE]

Unseenlabs Collaborates with S&P Global for the Integration and Utilization of its Radio Frequency Data

Unseenlabs, the global leader in space-based radio frequency (RF) detection, has announced it will supply S&P Global, a leading provider of information services and solutions to the global markets, with RF data dedicated to maritime surveillance. This unprecedented data provides a more reliable understanding of routes and activities at sea, going beyond the limitations of AIS.

This collaboration with S&P Global confirms Unseenlabs' unique position, built since 2015 on the analysis of hundreds of thousands of RF signals. Capable of detecting and locating vessels even when their AIS system is switched off, this data has essential applications: maritime surveillance, combating illegal fishing, monitoring trade flows (with nearly 70% of global trade value estimated to transit by sea), preventing pollution, and assessing risks for insurance and transportation.

"Being chosen by such a prestigious player as S&P Global is a strong recognition of our expertise," said Clément Galic, CEO and Co-founder of Unseenlabs. "It shows that RF data is no longer just an innovation, but a trusted tool for decision-makers around the world."

By joining S&P Global's solutions, Unseenlabs' RF data will bring a new dimension to the analyses delivered to clients in over 150 countries, contributing to a better understanding of global maritime activity.

Furthermore, Unseenlabs will launch its second constellation of new satellites in 2026. This next generation will expand capabilities beyond the maritime domain to provide multi-domain surveillance (maritime, land, and space), serving defense, environmental, and global security needs.

ABOUT S&P GLOBAL

S&P Global (NYSE: SPGI) provides essential intelligence. We enable governments, businesses and individuals with the right data, expertise and connected technology so that they can make decisions with conviction. From helping our customers assess new investments to guiding them through sustainability and energy transition across supply chains, we unlock new opportunities, solve challenges and accelerate progress for the world. We are widely sought after by many of the world's leading organizations to provide credit ratings, benchmarks, analytics and workflow solutions in the global capital, commodity and automotive markets. With every one of our offerings, we help the world's leading organizations plan for tomorrow, today.
